EDUCATION

Istanbul Technical University

B.Sc. in Computer Engineering – GPA: 3.84 / 4.00

Istanbul, Turkey

2023 – Present

EXPERIENCE

Turkcell

Aug 2026 – Present

Part-Time Cloud Architect, Cloud Center of Excellence

Istanbul, Turkey

- Support the company-wide migration to GCP as a cloud architect within the Cloud Center of Excellence team.
- Design and maintain landing zone configuration, project and folder hierarchy, and IAM guardrails; govern cloud resources across environments.
- Deliver infrastructure as code with Terraform across GCP compute, messaging, caching, and VPC networking services.

AI & Analytics Intern

Jan 2026 – Feb 2026

- Proposed and engineered a product recommendation pipeline for the Pasaj e-commerce platform using SBERT, PCA, and LightGBM with advanced feature engineering.

Mercedes-Benz Türk A.Ş.

Jul 2026 – Aug 2026

IT Project Member – Internship (Hybrid)

Istanbul, Turkey

- Coordinated and tracked development processes with developer teams using Jira and Confluence, integrating corporate automation workflows with collaborative project management.
- Participated in the planning and management of an enterprise Agentic AI invoice processing project built on OCR and AI inference.
- Designed and implemented enterprise automation with UiPath (RPA) and Power Automate.

National Software Certification Center

Jan 2025 – Jul 2026

Part-Time Computer Engineer

Turkey

- Administered Linux/Unix servers; managed container orchestration across Docker Swarm and Kubernetes clusters.
- Designed internal LAN architecture: self-hosted DNS with rewrites, master Nginx reverse-proxy nodes, and DMZ segmentation.
- Deployed and maintained self-hosted services (Open WebUI, ShareLaTeX, JupyterHub, AdGuard, Portainer) with automated backup pipelines.

SnA Consulting

Jul 2025 – Aug 2025

Full-Stack Development Intern

Turkey

- Independently designed and delivered a corporate intranet management system using React, Django REST Framework, and PostgreSQL.
- Integrated Google OAuth 2.0 and implemented a multi-level role-based authorization system.

PROJECTS

feast | *Django REST Framework, PostgreSQL/PostGIS, React, K3s, GitHub Actions*

Jul 2024 – Present

- Founded and led a technical team; architected the full platform from scratch, overseeing product, branding, and corporate scaling.
- Built REST APIs with Django REST Framework; designed PostgreSQL + PostGIS schema for spatial data handling.
- Established CI/CD via GitHub Actions; migrated infrastructure from Render to Hetzner Cloud with K3s clusters and load-balancer traffic management, plus object storage (AWS S3 → Cloudflare R2) and transactional mail (AWS SES → Resend).

LingUI | *Django, Go, Redis, WebSockets, Gemini API, Celery*

Dec 2025 – Present

- AI-powered website translation service with one-line code integration, supporting 100+ languages.

- Three-layer caching system (client-side → Redis → PostgreSQL) minimizes AI API calls; Go WebSocket server with a Celery-backed async translation pipeline.

Internal Network Architecture | *Docker Swarm, K3s, Nginx, AdGuard, Grafana* NSCC, Jan 2025 – Jul 2026

- Designed and deployed the organization’s full internal infrastructure: Portainer, Nginx reverse proxies, Open WebUI, ShareLaTeX, JupyterHub, AdGuard, and Grafana.
- Implemented DNS rewrites, DMZ segmentation, automated backup solutions, and container orchestration across Docker Swarm and Kubernetes clusters.

Neuromorphic Computing Research | *Python, Scikit-learn* NSCC, Sep 2025 – Present

- Optimizing and benchmarking a novel brain-inspired data clustering algorithm against state-of-the-art competitors.

Agentic AI Invoice Processing | *Agentic AI, OCR, UiPath, Power Automate* Mercedes-Benz, Jul – Aug 2026

- Contributed to the planning and automation design of an enterprise invoice processing workflow combining OCR extraction with AI inference and RPA-driven task orchestration.

Log Reviewer Bot | *Python, MCP, LLM Integration* Turkcell, Jan 2026

- Developed a desktop AI service that monitors internal service logs and delivers natural-language analysis of uploaded log files via conversational LLM integration.

Teknofest Hepsiburada NLP Hackathon | *CharCNN, Python – National Finalist* 2025

- Built a high-efficiency Turkish address-parsing solution using Character-level CNN instead of heavy transformer models (BERT), achieving competitive accuracy at significantly lower latency.

TECHNICAL SKILLS

Programming Languages: Python, Go, C, C++, JavaScript, SQL

Backend Development: Django, Django REST Framework (DRF), FastAPI, Flask

Frontend Development: React, Redux, React Router, Tailwind CSS, HTML5, CSS3, JavaScript ES6+

DevOps & Infrastructure: Docker, Kubernetes, K3s, Docker Swarm, Terraform, Infrastructure as Code (IaC), Nginx, Portainer, Harbor, Cloudflare, GitHub Actions, CI/CD Pipelines

Cloud Platforms: Google Cloud Platform (GCP), Hetzner, AWS, Cloud IAM, VPC, Cloud Modules

Databases & Caching: PostgreSQL, PostGIS, MySQL, Redis, Database Design & Optimization

Message Queues & Workers: Celery, Redis Queue, Pub/Sub, Asynchronous Task Processing

Networking & Systems: DNS Configuration, DMZ Architecture, WebSockets, RESTful APIs

AI & Machine Learning: NLP, Agentic AI, OCR, Character-level CNN, Gemini API, Neuromorphic Computing, Scikit-learn, PyTorch, TensorFlow, OpenCV

Automation & Collaboration: UiPath (RPA), Power Automate, Robotic Process Automation, Jira, Confluence, Agile/Scrum

Tools & Technologies: Git, GitHub, Linux/Unix, MCP (Model Context Protocol)

Architecture Patterns: Microservices, Cloud Landing Zone Design, Event-Driven Architecture (Pub/Sub), Three-tier Caching, Multi-region Deployment, Real-time Systems

LANGUAGES

Turkish: Native **English:** Advanced (academic & professional proficiency)
